It is important to tell the people you will communicate with the number of the Suite that you will be occupying so the communication can be established.

To dial a number press 9, wait for the tone and then dial the number. To call reception just dial 451 or 450 and to communicate with other suite just dial the suite number. To call surveillance just dial 600.

It is important to note that in the internal telephonic service there is no access to the numbers 02 and 09, you can call 030(exact time) or 140(information). Important note; this system is all managed by computer, the mechanism to charge operates after dialing the last number you dispose of four rings before the computer registers any charge, after the fourth ring or after the call has been answered the computer registers the number and starts the chronometer, including when the phone goes to voicemail, that is why we recommend to insist 2 or more times adjusting to the rings allowed, on the contrary the system will start to apply the charge.

For the security of our occupants we manage a limit in the credit of the calls allowed, when you reach that limit the line will cut and it will re-open in the moment that you make the total payment.
